

Haines-Aaronsburg Municipal Authority is requesting letters of support for its Water System Improvement Project. This project will benefit the entire HAMA system. We understand it is the intent of the Centre County Commissioners to apply for federal CDBG Competitive funds through DCED to support this project. Your letters of support are critical for this project to be considered for CDBG Competitive grant funding. Please address all letters to: Mitzi Gallagher-Long at SEDA-Cog. Mitzi Gallagher-Long, mgallagherlong@seda-cog.org, SEDA-COG, 201 Furnace Road, Lewisburg, PA 17837 and copy letters to: Senator Jake Corman, www.jakecorman.com, Centre County District Office, 236 Match Factory Place, Bellefonte, PA 16823 and Stephanie Borowicz, sborowicz@pahousegop.com, 18 East Main Street, Suite II, Lock Haven, PA 17745.

Contact Pat Valentine if you have questions @ 814-349-8776

Haines-Aaronsburg Municipal Authority
Water System Improvements Project
2020 CDBG Competitive Application
Project Narrative

The scope of this phase of the project is to install the raw water transmission main from Well No. 8 to the water treatment plant and the finished water transmission main from the plant to the distribution system. Under HAMA's Consent Order and Agreement from PA DEP, HAMA is required to install these two water lines. These two water lines would benefit the entire system since they would transmit water to and from the treatment plant. This phase will also replace and relocate the existing Henry Street PRV and would also replace the old cast iron finished water transmission main which is in severe need of replacement. This project would aid in providing clean finished water to customers of the HAMA system.
